

DAVID GHOLI RAHMADANA

Software Engineer | Full-Stack Developer

Banyuwangi | +62 852-3614-1235 | me.davidrahmadana@gmail.com | [linkedin.com/in/davidrahmadana](https://www.linkedin.com/in/davidrahmadana) | github.com/medavidrahmadana

Software Engineer with 3+ years of freelance and professional experience developing web and mobile applications using Laravel, Vue.js, Nuxt.js, Flutter, and MySQL. Experienced in RESTful API development, database design, system integration, and business application development. Currently contributing to 16+ client projects at PT Cubiconia Kanaya Pratama and recognized as Employee of the Month within three months of joining.

EDUCATION

Telkom University

Bachelor of Software Engineering | GPA : 3.48

Bandung, Indonesia

2021 - 2025

EXPERIENCE

Software Engineer - PT Cubiconia Kanaya Pratama

Mar 2026 - Present

- Contributed to the development and maintenance of 16+ client projects across web, backend, frontend, and mobile applications.
- Developed and maintained applications using Laravel, Vue.js, Nuxt.js, Flutter, MySQL, and CodeIgniter.
- Built RESTful APIs and implemented business logic for internal and external systems.
- Developed mobile applications integrated with existing web platforms.
- Collaborated with cross-functional teams in a remote Agile development environment.
- Awarded Employee of the Month (May 2026) after three months of service for outstanding project contributions.

Backend Developer - Freelance / Project-Based

Jan 2023 - Present

- Built 5+ production-ready applications and assisted in deployment and maintenance.
- Designed RESTful APIs and database schemas to support marketplace, reporting, and patient-monitoring features.
- Improved endpoint performance by optimizing Eloquent queries, relationships, and pagination, resulting in faster response times.
- Assisted in deploying web applications to hosting environments on selected projects.
- Collaborated with clients to gather requirements and deliver solutions within deadlines.

SELECTED PROJECTS

Empowr - Task Outsourcing Platform | Laravel, MySQL, Blade

- Developed task marketplace modules including posting, application, review, and assignment.
- Developed escrow-based payment workflow within the platform.
- Created admin dashboard for task insights.

BMS Untan - Campus Reporting System | Laravel, MySQL

- Created reporting modules for academic operational processes.
- Designed secure database architecture.

RespiraCare - Patient Monitoring App | Laravel, MySQL

- Built web app to record and monitor respiratory patients.
- System registered under copyright.

Tel-U Adventure - Campus Exploration Mobile App | Flutter, Firebase

- Built features to guide new students with campus navigation.
